

ADDITIVE CONCENTRATE

The invention provides an additive concentrate which comprises an oil soluble hydrocarbyl poly(oxyalkylene) aminocarbamate having a number average molecular weight ( $M_n$ ) in the range 600 to 10,000 having at least one basic nitrogen atom wherein said hydrocarbyl group contains 1-30 carbon atoms, and an oil soluble hydrocarbyl amine of formula  $R-NH_2$  wherein R represents a group  $R'$  or a group  $R'-CH_2-$ , wherein  $R'$  represents a hydrocarbyl group having a number average molecular weight ( $M_n$ ) in the range 750 to 6,000; a gasoline composition containing such additive concentrate; and its preparation; and a method of operating a spark-ignition engine using such gasoline composition.
